Why we develop Smart Home Panel 2

Compared with Smart Home Panel(Gen 1)

Smart Home Panel

From

- Transfer switch

To

Electric Subpanel •

Smart Home Panel 2

Why Choose EcoFlow & SHP2

1. A Breakthrough in Panelboard Technology

Features ATS, UPS, Backup Energy storage, Remote control, and Energy management.

2. Streamlining Installations for Electricians

Install just like any other regular subpanel on the market without any hassle

3. Providing Unmatched Reliability and Installer Support

High-quality level with expert customer support 9AM – 9PM (Monday to Friday EST)

Understanding Smart Home Panel 2

EcoFlow Delta Pro Ultra and Smart Home Panel 2

The world's first smart hybrid whole-house battery system

Month-long power security

One unit, all appliances covered

Unlock advanced backup with Smart Home Panel 2

One-hour solar is a one-day powered home

- Automatic Transfer Switch & UPS

UPS with a 20 ms switchover from the grid to battery backup

- The most powerful backup solution

When connected to the EcoFlow Delta Pro Ultra, it can deliver an output of up to 21.6kW with a storage capacity of 90 kWh.

- Designed for Generator hookups

- Intelligent App Controls

Energy management and automation

- Hassle-free Installation

Battery Connection Box

Instructure

Specifications

- AC voltage (nominal) : 120V/240V
- Maximum current rating : 100A panel / 90A storage
- Busbar rating : 120A
- Single largest load : ≤ 60A
- Operating temperature: -22°F to 122°F (-30°C to 50°C)
- Enclosure type: NEMA TYPE 3R rainproof (distribution panel) NEMA TYPE 1 (battery connection box)
- Number of load branches : 12
- Communication : Ethernet, Wi-Fi, and Bluetooth®
- Certification : UL67
- Weight : 51.6 lb (23.4 kg)
- Dimensions : 31.8 in. x 14.4 in. x 4.3 in. (806.4 mm x 365 mm x 108.4 mm)
- Compatible generator : 120/240V single phase (3-12kW)

What's in the box

How to install Smart Home Panel 2

How to Install the Panelboard

Installation scenarios

1. Install the entire SHP2 indoors

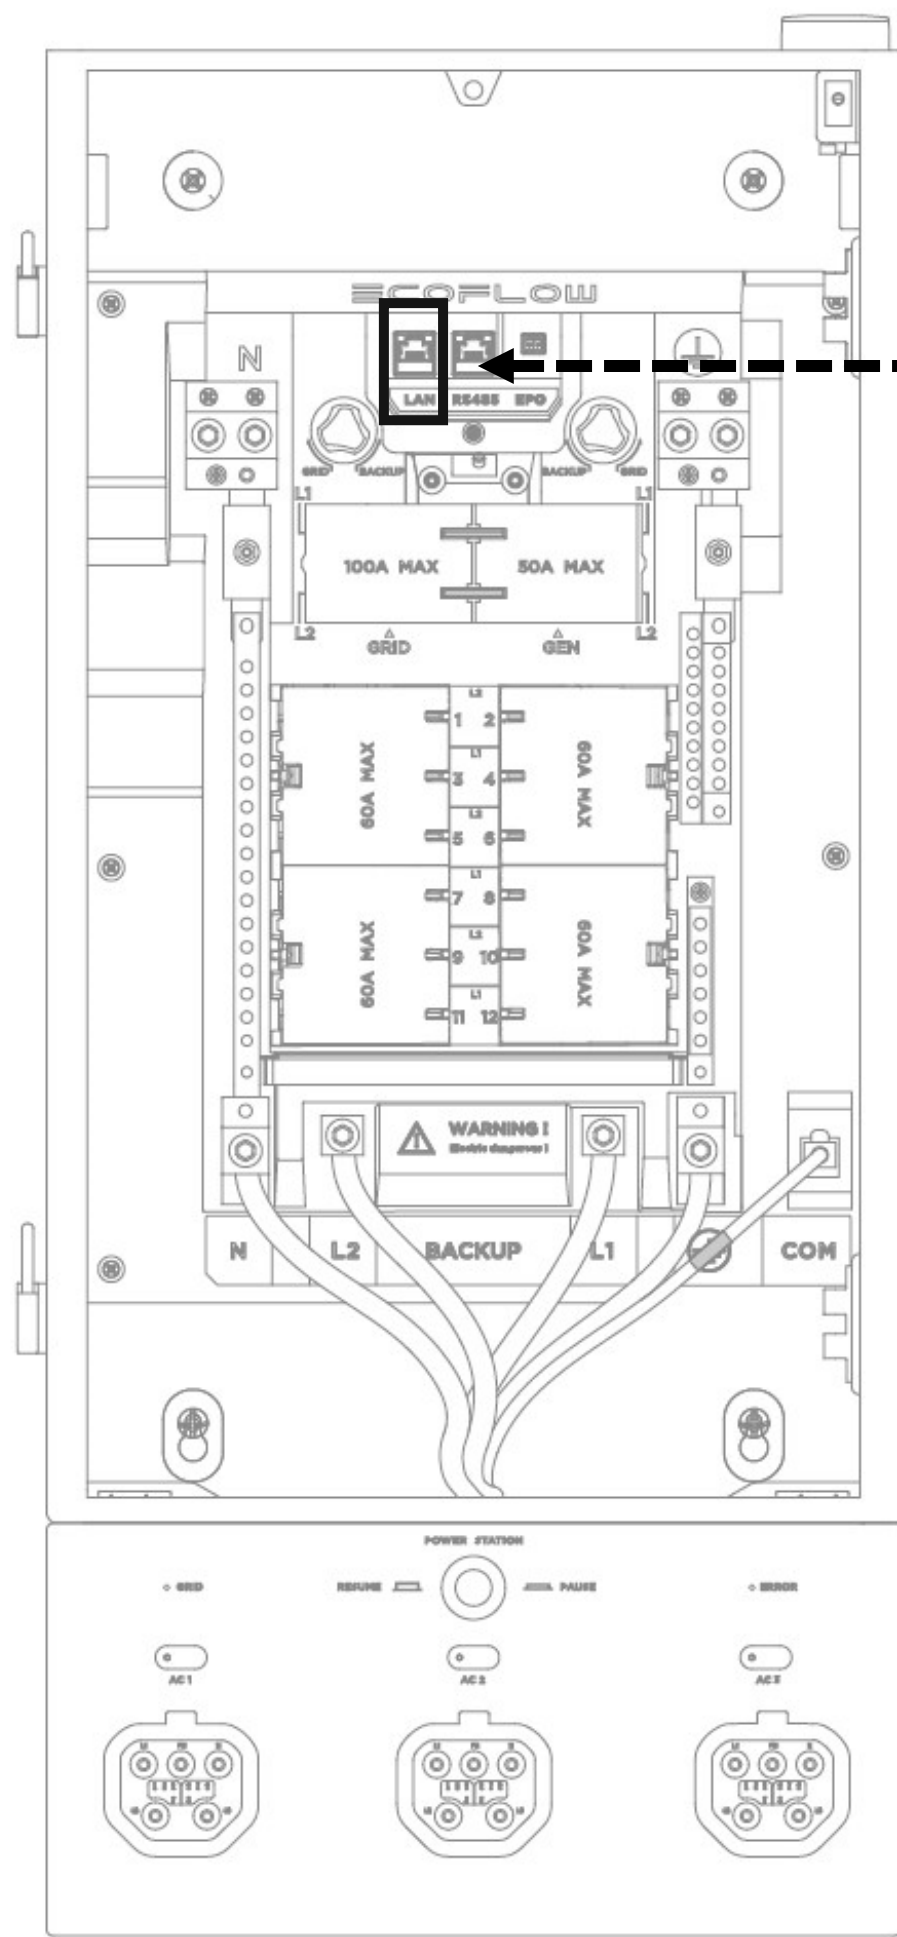

2. Install the distribution panel and the battery connection box separately

3. Surface-mounting & flush-mounting

How to Install the Panelboard

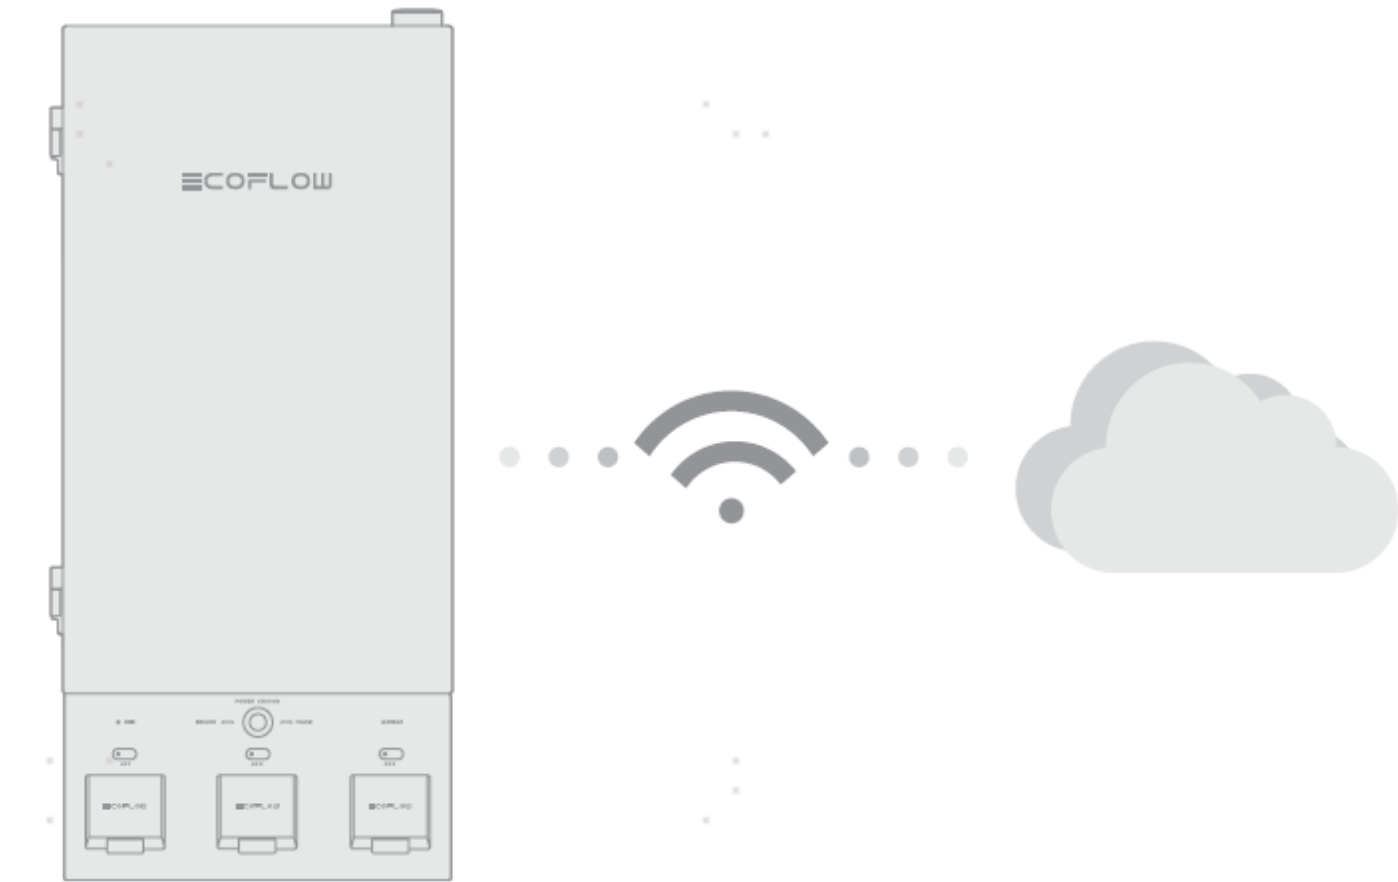

Internet Access

Wired Connection

Wireless Connection

Wiring

Connecting to EcoFlow PPS

A. For DELTA Pro Ultra, up to 3 sets

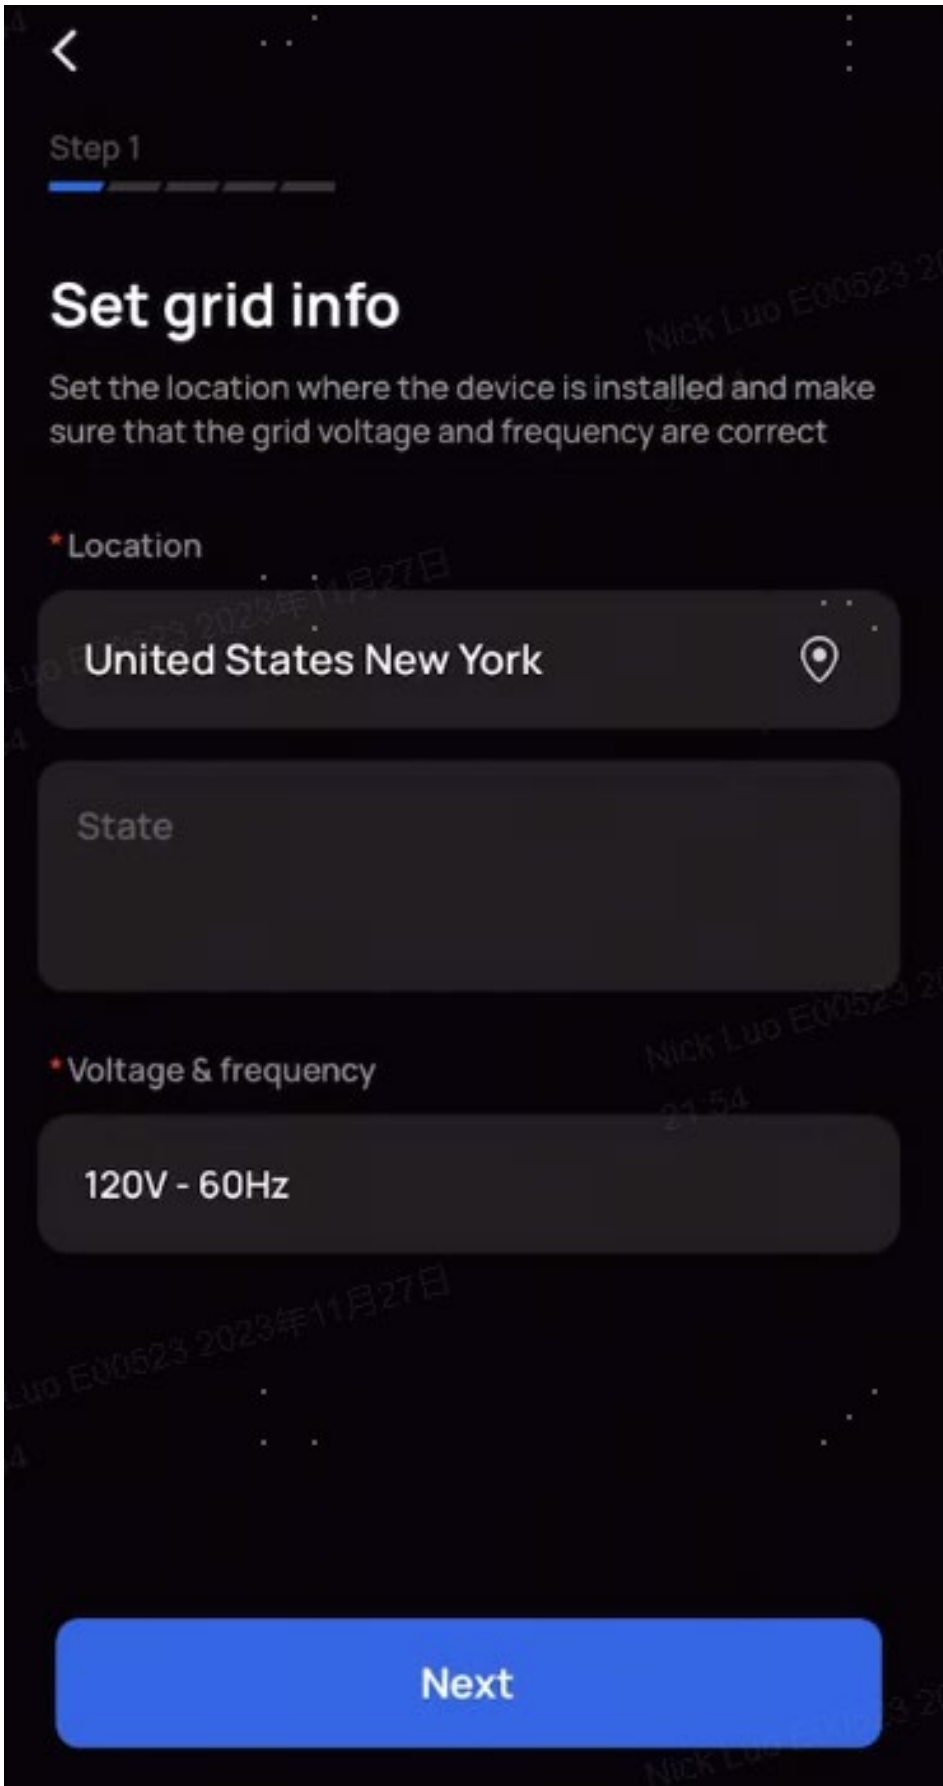

B. For DELTA Pro, up to 2 sets

Key Notes

- Single largest load $\leq 60A$
- Remove and install the interlock before and after wiring
- Don't forget the communication cable
- Materials that should be prepared in advance : 2 x 100A circuit breaker, 1 1/2 inches conduit fittings (install separately)
- Check the compatibility of the existing circuit breakers
- Only supports Plug-in type breakers with a pigtail and does NOT support breakers with a plug-on neutral breakers
- GFCI/AFCI circuit breaker CANNOT be used as main breaker
- Cannot work with Generator that has a bonded neutral

Commissioning Guide

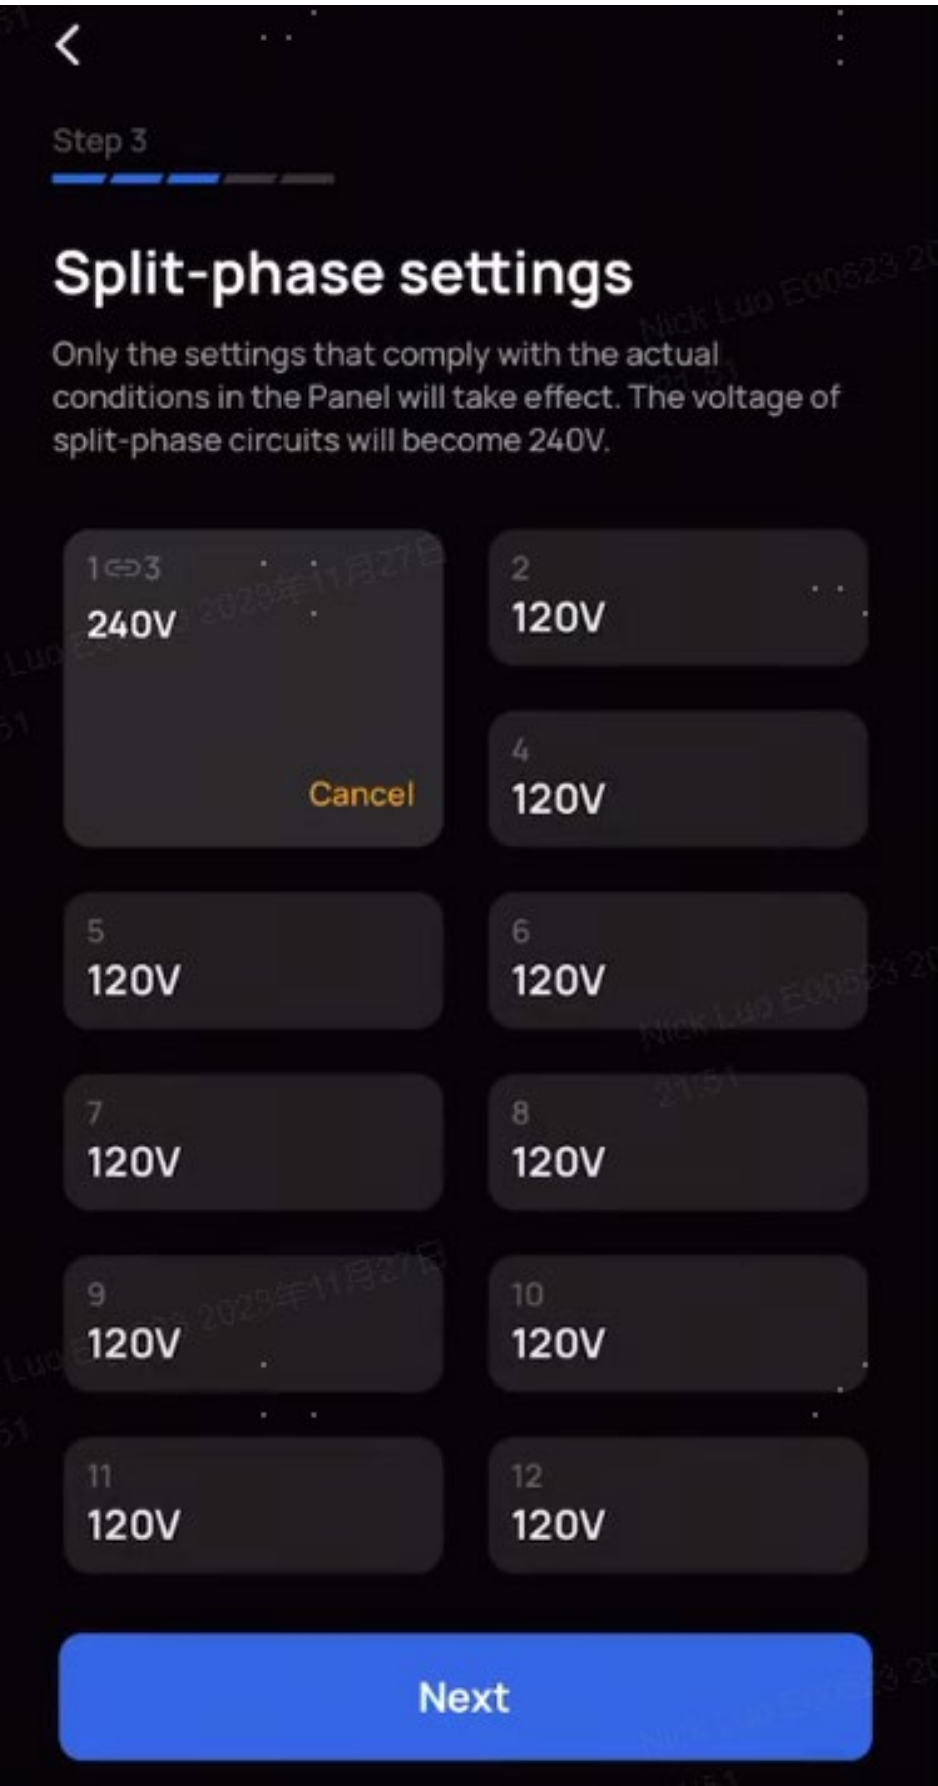

Step 1: Set grid info

Step 2: Set maximum current for main circuit and generator circuit

Step 3: Set maximum current for branch circuits

Step 4: Set split-phase for branch circuits

Step 5: Circuit info review
